

Nadia Hassan ? AI/ML Engineer

Cairo, Egypt | nadia.hassan@email.com

SKILLS

Languages: Python, R, SQL

ML Libraries: Keras, Hugging Face Transformers, spaCy, NLTK, scikit-learn

Deep Learning: neural network design, transfer learning, fine-tuning pre-trained models

Data Tools: Pandas, NumPy, Apache Spark, Jupyter Notebooks

Experiment Management: Weights & Biases (WandB), DVC

Model Serving: Flask-based model APIs, containerisation with Docker

Cloud: Google Cloud Platform (GCP), BigQuery, Cloud Storage

Practices: natural language processing, text classification, named entity recognition

Soft Skills: research mindset, written communication, presenting findings to stakeholders

EXPERIENCE

ML Engineer ? Hive (2021?present)

- Built text classification pipelines using fine-tuned BERT models (Hugging Face)
- Managed model experiments using WandB and DVC for reproducibility
- Deployed models as REST APIs using Flask + Docker

Data Scientist ? Synapse Analytics (2019?2021)

- Ran NLP pipelines with spaCy for information extraction
- Used Apache Spark for processing large-scale datasets

EDUCATION

MSc Artificial Intelligence ? German University in Cairo (2019)
